

# Leading Edge Portrait techniques

by

Frank E. Cricchio, M. Photog., Cr., F\_ASP

This program will cover portrait techniques that have been developed by Frank Cricchio over the past 40 years while operating his professional portrait and commercial studio. Cricchio is currently the technical advisor for FUJI Film U.S.A., Inc.

You can expect to learn the following topics:

Proven hand posing using pressure points.

Simplified lighting set up using the NEW triangle method developed by Cricchio.

Three techniques of achieving specular highlights in your photographs.

Simple use of light meters for perfect exposure under all light conditions

Easy one-step method to establish your working exposure index for color negative film.

Perfect hi-key portraits using the new "Porcelain" lighting technique.

Low key and Hi-key portrait theory and application

Exposure information on FUJI *Color Negative Films, NPS, NPH, and NHG II.*
